To whom it may concern:

I am submitting my resume for your consideration. I am looking forward to contributing my business and Trainer skills while expanding my experience.

I am qualified and have experience in troubleshooting the Front End and the Back End of a Wordpress platform whether it is the PHP and MYSQL side or the HTML, CSS, and Javascript side of things. I once troubleshooted a website that was having a problem with their account and I had to code in PHP in order to correct this problem. I have also created and troubleshooted forms that were using Gravity forms. An example is www.agmblaw.com/poe that uses a gravity form and conditional logic. I, also, once had an issue with a slideshow arrow being covered by a Sass component in which I troubleshooted and resolved using Sass. There are many experiences like this that I would like to convey to you which makes me the best fit for this position.

Some of my websites are listed on my resume but I have over 30 websites that I have maintained, edited, and built.
